About Horrex

As part of the Driving Change group of companies, Horrex is a growing designer and manufacturer of products for the middle and high-end segments of the recreational vehicle (RV) market. The product range includes flyscreen doors, blind and flyscreen systems for windows, room dividers, windows, skylights and other products.

Horrex is headquartered in The Netherlands and operates with a hub in the UK. We supply leading OEMs in 32 countries, including the United Kingdom, Germany, France, Italy, Australia, Japan, Canada and the USA. All Horrex products are

characterised by innovation, flexibility and modularity. Thanks to these key aspects, integrated in their design, Horrex's portfolio of products is modular and flexible to meet all RV needs.

Horrex can quickly customise products to any interior and design. These products can be supplied completely assembled as well as a flat-pack kit, all according to the customers' preferences.

Innovation

Flexibility

Modularity

Innovation

From the start in 1987, Horrex has introduced new concepts to the market and innovated existing systems. Horrex was the first to launch a flyscreen door for a recreational vehicle.

Over the years more innovations have followed:

- Pleated flyscreen versions
- Stepless pull bar
- Black-out pleated blind
- Flyscreen door for camper vans
- Curved systems
- Black-out honeycomb fabric
- Fire retardant material
- Tailored products for individual customers and markets worldwide

In line with our group's philosophy DRIVING CHANGE we aim to introduce new products every year!

Countries**

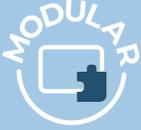

1 Window Blind Solutions

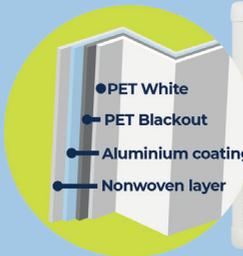

Unlimited Creative Solutions (UCS)

Thanks to its innovative design, the Horrex UCS is the most compact, quick to install window blind and flyscreen system on the RV market. The attractive, yet practical design has a solid construction to ensure quiet and hassle-free use. This is particularly important when driving a motorhome. The modular system is available with various interfaces to fit virtually any aluminium or rubber framed window in a recreational vehicle.

The shading fabric is available in single and double pleat honeycomb options, both made of black-out material. The high-quality flyscreen mesh allows excellent airflow while keeping unwanted bugs out. Both the black-out fabric and the mesh are available in fire retardant versions.

The standard UCS configuration combines mesh at the top and fabric at the bottom, however it is possible to apply only mesh or fabric.

UCS Options

Colour options

Covers and caps are available in traffic white (RAL9016), cream (RAL9001) and grey (RAL7047). We provide other colours on demand with a minimum order quantity. The covers and caps are clickable and therefore easy to replace for a change of colour or repairs.

Black-out pleated fabric

A regular pleated blind has holes in the fabric for the guiding cords. To prevent light coming through, Horrex provides a 100% black-out option consisting of cord guides that are placed behind the fabric.

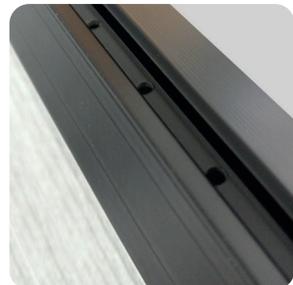

Black-out honeycomb fabric

The closed-cell structure means that the black-out honeycomb fabric has excellent insulation properties for comfortable travel in both hot and cold climates. The cords are guided through the fabric panel, therefore being invisible from either side. For a consistent appearance, flyscreen mesh is also available in honeycomb.

Ventilation

In order to reduce the accumulation of heat between a 100% black-out single pleated or honeycomb blind and a window, Horrex's UCS will be provided with perforated profiles to allow ventilation.

Resizeable blinds

FRAME	FABRIC	SIZE
PVC ■	Black-out pleated blind with insect screen	Custom

The unique resizeable UCS means that from just 15 kit sizes you can truly resize for every window in any caravan, camper or motorhome.

Delivered in a ready to cut kit with instructions.

Curved Solutions

FRAME	FABRIC	SIZE
Aluminium ■ ■	Honeycomb black-out and mesh	Custom

The curved UCS has been designed to fit curved windows without taking away space from the living area. Every curved blind is executed with honeycomb black-out fabric and solid aluminium profiles tailored to the window radius. To create a matching appearance the flyscreen is supplied in honeycomb mesh.

R5000 blinds

FRAME	FABRIC	SIZE
Aluminium +PVC 	Black-out pleated blind with insect screen	Standard 8 sizes

With pleated insect mesh and black-out the UCS R5000 window blind in combination with the R5000 window is great for any campervan conversion.

Electric Solutions

FRAME	FABRIC	SIZE
Aluminium 	Honeycomb black-out and mesh	Custom

Operated by a remote control. The black-out and mesh can be operated independently of each other. The system has a smooth and silent operation and soft-stop closing. The shades operate at 12V and are independent of the campsite power. This product can be customized with preset positions.

Curtains & Marquee

The newest items in the UCS blind range are our Marquee and Curtain blinds.

Requiring less assembly - with just 1 system you can install a UCS and either a curtain (inside) or a marquee (outside). These new accessories complement the UCS line and combine well with our signature E-line flyscreen door due to their matching frame design.

Marquee: this blind will help keep the sun out and create shadow while allowing maximum airflow into the RV. It is easily opened and closed from within the vehicle. The blind is protected by the window, giving it a longer life than regular outside blinds.

Curtain Blind: an integrated curtain rail and curtains are added to the UCS blind for one complete look. This compact design also features integrated LED lighting for extra atmosphere. It is a modular system and comes as an add-on cap profile that clicks on existing Horrex blinds.

Windows R5000

FRAME	SIZE	
Aluminium	280 x 380	750 x 465
	490 x 500	818 x 315
	560 x 465	960 x 450
	700 x 510	985 x 465

Thanks to the high-strength powder coated curved aluminium frames the DC flush acrylic windows are a must have for any campervan conversion. Double-glazed and UV resistant tinted acrylic glass make these windows ideal for the vanlife summers.

Windows Straight

FRAME	SIZE		
Aluminium	350 x 500	500 x 300	
	700 x 350	500 x 400	
	700 x 450	500 x 500	
	900 x 450	500 x 520	
	900 x 500	500 x 550	
	1000 x 500	700 x 400	
	1100 x 550	700 x 520	
	1200 x 300	800 x 450	
	1200 x 500	900 x 300	
	1300 x 550	900 x 520	
	1450 x 550		
	*custom on request		

High-end excellent quality scratch-resistant acrylic glass combined with an aluminium frame. Both windows feature multi-angle stays. Combine with our matching blinds to create a unified look for your motorhome or caravan.

2 Flyscreen Doors

All Horrex flyscreen doors are equipped with high-quality pleated mesh to offer protection against insects while ensuring an excellent airflow.

From the inside, the dark mesh provides an excellent view of the outside. The sliding mechanism is fully adjustable and silent in operation.

The unique modular system means that the flyscreen doors can suit a wide range of caravans, camper and campervan models.

Horrex flyscreen doors are available in aluminium and PVC versions.

Flyscreen Door - E-Line

This quality PVC system can be matched up with the UCS window blind design for a coordinated interior. Additional features include full magnet closing, bottom guider to reduce dirt accumulation and quick installation.

FRAME

- PVC base

2

Van Flyscreen Doors

Horrex developed a flyscreen door for vans far in anticipation of the growing market.

The lightweight aluminium flyscreen door gives van owners the opportunity to enjoy fresh air and a wide open view of the great outdoors, without having to worry about mosquitoes and other annoying insects swarming the inside of the vehicle.

The curved cassette and pullbar take up a minimum of interior space. The screen has a smooth and silent operation.

The flyscreen door is available for a number of van types.

Fiat Ducato | Peugeot Boxer | Citroën Jumper Opel Movano

FRAME	MESH
Aluminium <input checked="" type="checkbox"/>	Pleated

Available in Left and Right-hand drive.
For models from 2007.

Mercedes Sprinter and Volkswagen Crafter | MAN TGE

FRAME	MESH
Aluminium <input checked="" type="checkbox"/>	Pleated

Available in Left and Right-hand drive.
Available for different build years starting 2007.

Ford Transit

FRAME	MESH
Aluminium <input checked="" type="checkbox"/>	Pleated

Available in Left and Right-hand drive.

Volkswagen T5/T6 | Caravelle | Multivan

FRAME	MESH	FEATURES
Aluminium <input checked="" type="checkbox"/>	Pleated	Includes entry step*

Available in Left and Right-hand drive.

* To achieve the perfect fit for the Volkswagen T5/T6

3 Tailgate Flyscreens

Horrex also provides manually operated screens for the backside of recreational vehicles.

Fully adjustable screens are available for Fiat Ducato vans family with hinged rear doors. We would welcome development requests for larger series of different bus camper makes and models.

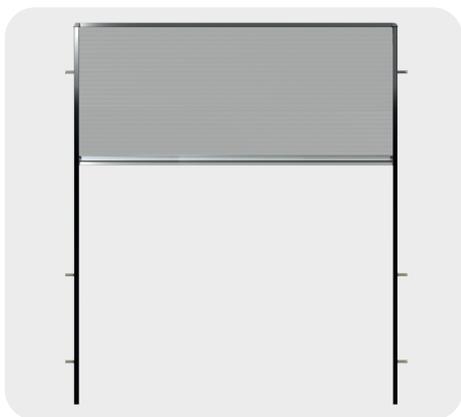

For motorhomes and toy haulers (US market) we also provide flyscreen solutions with optional shading for more privacy and to protect the interior against harmful UV-rays. Please get in touch for more details.

Rear Screens

FRAME	MESH	SIZE
Aluminium	Pleated	Fiat Ducato Peugeot Boxer Citroen Jumper Opel Movano

For the ever-growing campervan market, Horrex offers a series of tailgate flyscreen solutions. The aluminium framed rear flyscreen allows users to maximise airflow in their vehicle while being protected against insects. (for models from 2007)

Ramp Screens

FRAME	FABRIC	SIZE
PVC	Pleated mesh Pleated shade	Custom

Our ramp fabric has been specifically designed to meet the needs of the North American market where toy haulers are common. The ramp screen provides insect protection for the large rear openings while users can still enjoy a cool breeze. The top-down ramp screen is fully adjustable by hand and can be equipped with an optional sun shade for more thermal comfort and privacy.

4 Room Dividers

Thanks to the innovative design the room dividers are user-friendly and quick to mount or dismount.

In addition, they are light for their size and span. With the help of specially designed runners, the curtain stack is reduced to a minimum and takes up only a small amount of space when stored. As with all Horrex products, the room divider is highly modular and modifiable on demand. The track can be pre-bent, according to your specifications. The room dividers are available in two options, a basic and a more luxurious XS version.

Room Divider | Basic version

FRAME	FABRIC	FEATURE
PVC 	Pleated 	Strap closure

Pleated room divider for installation in caravans, campers or campervans. Available in two colours, with a top guiding track and when open is fixed to the wall with the help of a magnet plate.

Room Divider | XS Version

FRAME	FABRIC	FEATURE
Alu 	Pleated 	Click closure

The XS version has an extra feature, the click closure. This version also has a cassette profile on the wall side for easier fixing.

TV Blinds

The Horrex TV blind is a small divider that offers a solution to those who want to concentrate on a book or enjoy their night's rest. The top-down pleated blind can be easily tailored to your needs with regard to dimensions and installation.

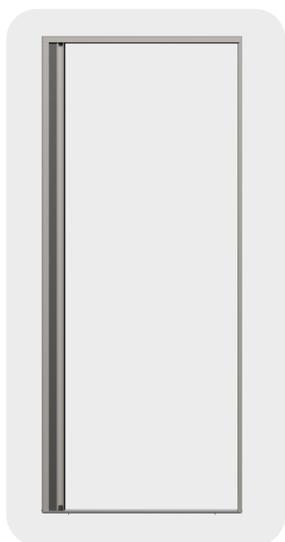

FRAME	FABRIC
Alu 	Pleated

5 Mobile home products

Patio flyscreen door

Introducing our high-quality Patio Flyscreen Door, the perfect combination of style and functionality for your mobile home. Available in both single and double doors.

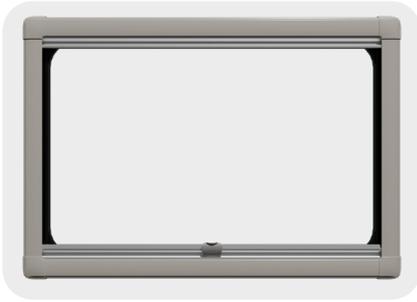

The Patio Flyscreen Door is manufactured from high-quality aluminium and finished in a beautiful matt/textured beige colour (RAL9001). This subtle, elegant finish complements a wide range of interior and exterior styles, and offers the durability and robustness you would expect from an aluminium product.

The single screen door is perfect for door sizes up to 2 x 1 metres, while the double screen door can cover up to 2 x 2 metres.

Keep unwanted insects out while enjoying fresh air and natural light in your home. The Patio Flyscreen Door provides effective protection from insects, without compromising the view or access to your outdoor space. The clever design makes this screen door easy to operate and a practical addition to your home.

Window blinds

Modern Look

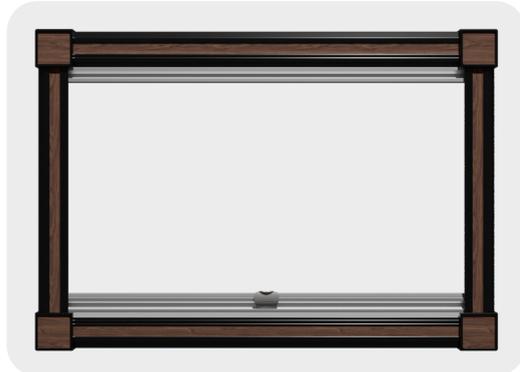

Our modern window blinds are specially designed for the mobile home market and offer the same sleek look as the popular UCS systems. These blinds feature elegant cap profiles that provide a seamless finish. Available in colours Beige (RAL9001), White (RAL9016) and Light gray (RAL7047), you can perfectly match your blinds to the interior of your mobile home.

Versatile Sizes

Our window blinds are available in the same sizes as the UCS, so you can be sure to always find the perfect fit for your windows.

Classic Look

For those who prefer a more timeless look, we offer our mobile home window blind with a classic, slightly squarer finish. This system comes standard in black (RAL9005), but offers extensive possibilities for personalization. Thanks to the specially designed profiles and corner caps, you can choose a wrap film in any desired color or pattern.

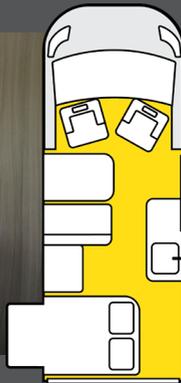

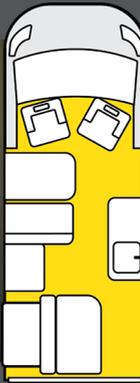

6 InnoSlide

INNOVATIVE CARAVAN, CAMPERVAN AND MOTORHOME SLIDE-OUTS

Interior space innovation

InnoSlide is another company within the Driving Change Group - we have developed a new slide-out system that provides more living space in your recreational vehicle. For small-sized vehicles, you can have the luxury of a bigger model without the extra weight. The slide-out is watertight and lightweight. It has a stylish design with radial corners and closes flush against the caravan, camper or campervan wall.

As the slide-out designer and manufacturer, we provide on-site support during tests/implementation and can customize the system.

inno SLIDE

Slideout for Caravans & Motorhomes

The InnoSlide is designed to create more living space in a motorhome or caravan. The system is self-supporting and does not require reinforcement of the vehicle chassis or extra connection to the chassis for installing.

The Slide-out is operated by 4 computer controlled motors, the computer constantly checks if the motors are in line and corrects or stops the motors if they are obstructed.

Due to a special seal and its design the system is watertight.

Campervan

The InnoSlide is also available for campervans. We offer a slide-out that fits the Fiat Ducato, Peugeot Boxer, Citroën Jumper, Opel Movano, Mercedes Sprinter and VW Crafter/MAN TGE. Mercedes Sprinter and VW Crafter/MAN TGE models up to 2017. More models are in development. The slide-out provides endless opportunities to design new internal layout options.

7 Clike Bikes

Meet Clike Bikes, our sister company within the Driving Change Group. These Dutch designed and build e-bikes are compact, comfortable and customizable. With a sturdy aluminium frame and a unique profile for clickable accessories.

Clike Traveller

The Clike Traveller has a powerful motor, automatic gears and a parallelogram saddle suspension ensuring a comfortable ride.

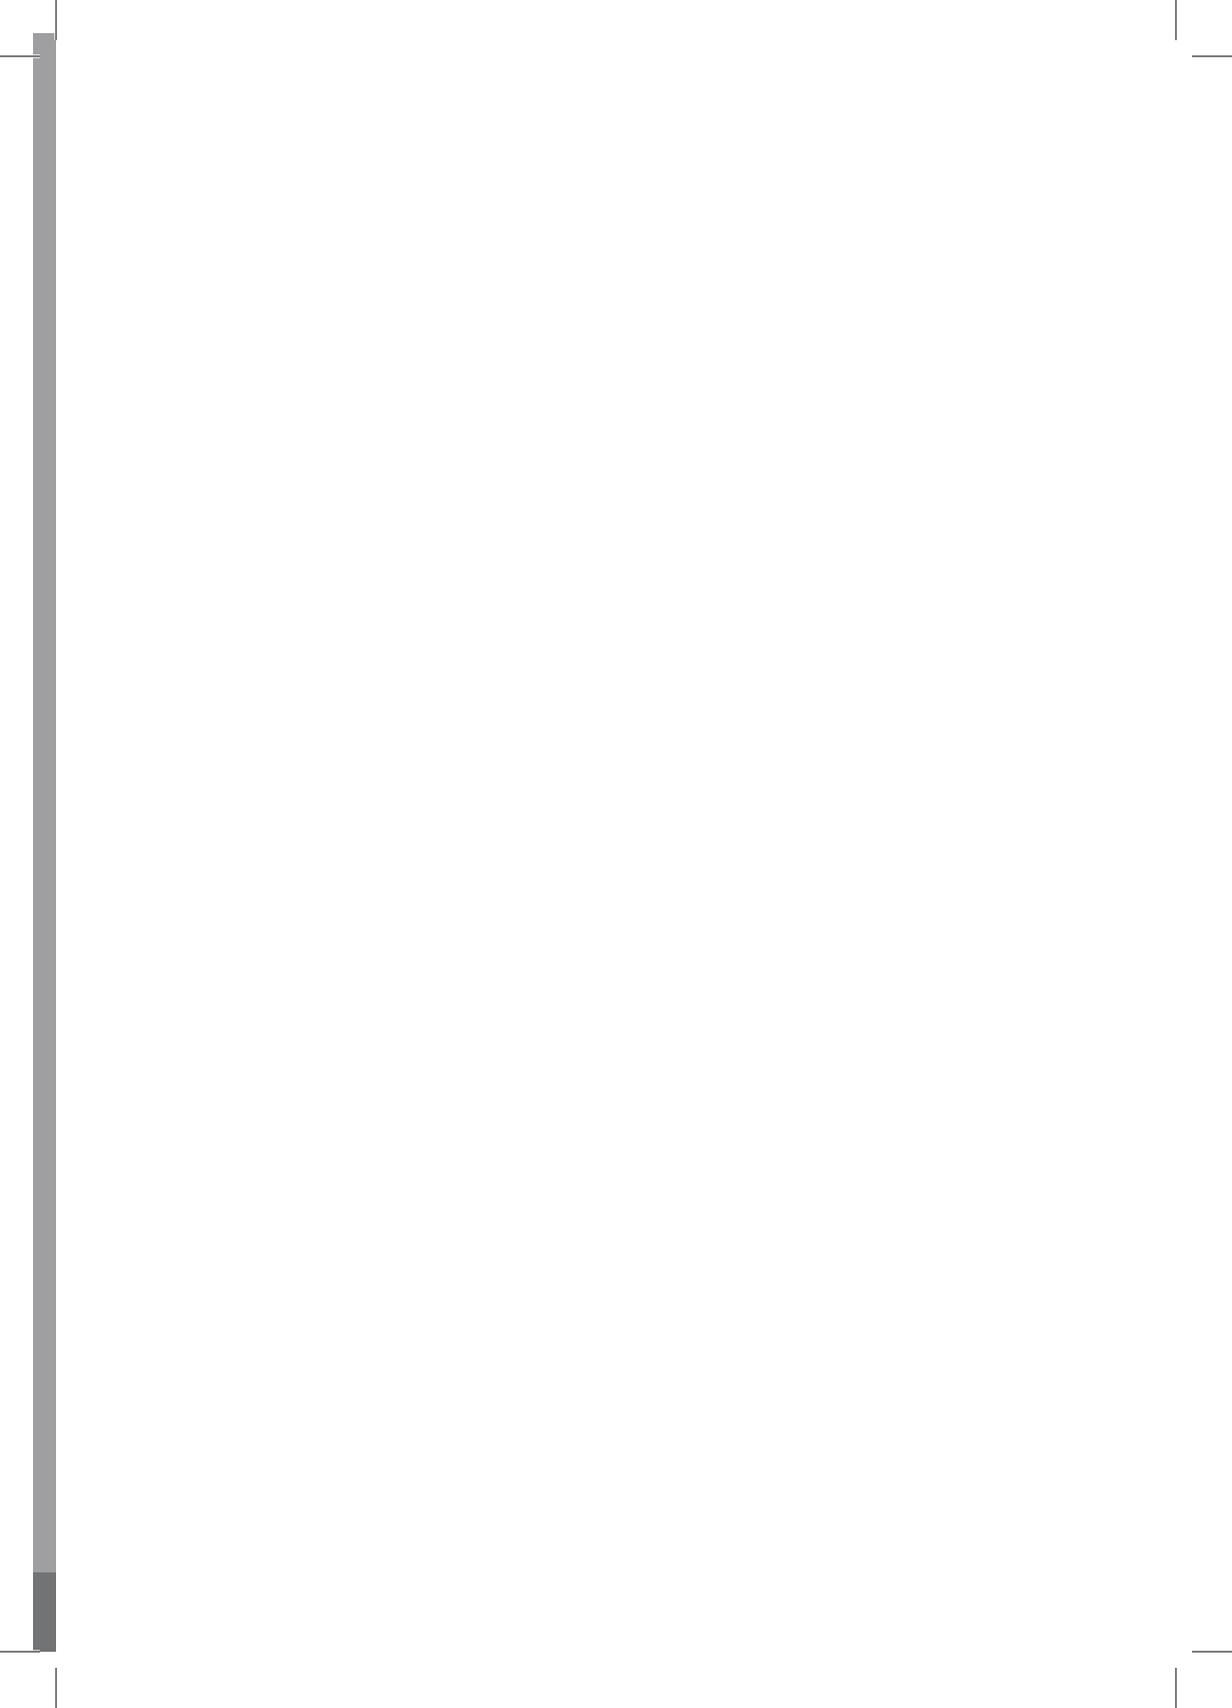

Clike iRider

The new Clike iRider - a compact e-bike with a travel radius of up to 60km. Featuring a Zehus rearwheel motor and regenerative brakes, the compact e-bike weighs only 16kg and is great for urban adventures.

For more info visit www.clikebikes.com

only 16kg!
